DETAILED ACTION

1. Claims 8-9 and 16-20 are pending. Claims 8-9 and 16-20 remain rejected.

This Action is made FINAL.

The text of those section of Title 35, U.S. Code not included in this action can be found in a prior Office Action.

Claims 8-9 and 16-20 remain rejected under 35 U.S.C. §103(a) over McArdle in view of Reddenbaugh. Applicant traverses primarily that McArdle does not teach or suggest a crop seed coating; that the ordinarily skilled artisan would not have been motivated to combine Reddenbaugh with McArdle because Reddenbaugh already teaches the advantage of crop seed coating; the coating of Reddenbaugh is water saturated while the seed coating of present invention is dry; and that there was a 21.8% increase in yield when potato seed pieces are coated with Zein-polysaccharide complex.

Applicant's traversal is unpersuasive. Applicant is reminded that the rejection is a 35 U.S.C. §103 and not a 35 U.S.C. §102 rejection, therefore, each reference DOES NOT have to anticipate each and every claim limitation. McArdle teaches the claimed composition and Reddenbaugh teaches the advantage of coating potato seed pieces. Thus there is motivation to use the composition of McArdle to coat potato seed pieces as taught by Reddenbaugh.

Regarding traversal three, Applicant is again reminded that in a 35 U.S.C. §103 rejection, a single reference DOES NOT have to anticipate each and every claim limitation. Furthermore, the claims don't require that the seed coating be dry.

Art Unit: 1638

The Smith declaration has been carefully considered but is rendered unpersuasive because the declaration is not commensurate in scope with the claims and Applicant is arguing limitations not present in the claims. The unexpected result was obtained using a zein-polysaccharide complex which is not a claim limitation.

Accordingly, this rejection is maintained.
